EMERY RESZKA

EmeryReszka@outlook.com | (317) 864-7197 | Osprey, FL | linkedin.com/in/emery-reszka | github.com/eareszka | eareszka.github.io

EDUCATION

Florida Gulf Coast University — Fort Myers, FL Expected May 2027
B.S. Computer Science | GPA: 3.0

University of Wisconsin–Milwaukee — Milwaukee, WI Sep 2022 – May 2026
NCAA Division I Swimmer — 4-year athletic scholarship
Coursework: Data Structures & Algorithms (Java), Algorithm Design and Analysis, Software Engineering

EXPERIENCE

IMG Academy — Bradenton, FL Jun 2026 – Aug 2026
Aquatics Staff Member

- Took ownership of guard rotations and staffing for 50–150 campers and student-athletes at once in a condensed pool area, rebalancing coverage as group sizes changed so no section went unwatched

UPS — Elm Grove, WI Sep 2023 – May 2025
Preloader

- Loaded delivery trucks in route order at a hub moving 20,000–30,000 packages each morning, getting trucks ready for dispatch while balancing a full course load and Division I training

SKILLS

Languages: Python, TypeScript, JavaScript, Java, C++, SQL, HTML/CSS
Frameworks & Libraries: Flask + SQLAlchemy, Django, React Native (Expo), PyTorch
AI-Assisted Development: Claude Code, Codex; parallel agent orchestration with herdr, branch-per-task isolation, cross-agent code review, and human approval on every merge
AI/LLM: Claude API, Ollama, QLoRA fine-tuning (Unsloth, TRL)
Linux (Ubuntu): WSL2 for CUDA training and Docker tooling Windows can't run; home GPU server running Ollama behind a Cloudflare Tunnel; containers on Fly.io and Render
Tools & Platforms: Git, GitHub Actions, Docker, Fly.io, Render, Neon Postgres, Stripe Connect, Trello

PROJECTS

Pay My Bill – Community Giving App Oct 2026 – Present
Python, Flask, SQLAlchemy, PostgreSQL (Neon), Stripe Connect, Render github.com/eareszka/pay-my-bill

- Added card payments with Stripe Connect after Stripe rejected the first setup because the platform would be liable for losses; switched to Stripe's Managed Risk with direct charges to recipients, so the app never holds money, and took card payments live
- Ran a solo project like a team: one-week Scrum sprints, a Definition of Ready/Done, decision records, and required CI (lint, types, tests, dependency audit, secret scan) on main; directed AI agents (Claude Code, Codex) on each story and reviewed every PR, merging 89 PRs across 7 sprints in 16 days

WingIt! – AI Texting Coach Jun 2026 – Present
React Native (Expo), TypeScript, Python, Claude API, Ollama, PyTorch, Docker, Fly.io wingit-backend.fly.dev

- To cut API costs and keep users' chats off third-party servers, moved the AI backend from Claude to self-hosted models on my own GPU (Ollama behind a Cloudflare Tunnel, Claude as fallback), switching only after my eval suite showed 98.8% speaker accuracy vs. 87% for Claude Haiku on 60 test screens, at half the latency
- Built iOS, Android, and web from one Expo codebase, with a Python backend on Fly.io handling account rate limits, App Store subscriptions, and a free tier; submitted to the App Store

Campus Event Management System – Team Lead Nov 2025
Python, Django, HTML/CSS — 4-person team project github.com/eareszka/campus-event-mgmt

- Led a 4-person team building a platform for students to find and register for campus events and for organizers to manage capacity; split the project into tasks on a Trello board and ran weekly check-ins to track progress and unblock teammates
- To keep the team on pace for the deadline, took on the majority of the work across the front end and back end, including the Django data model with role-based access (admin, organizer, student), admin event approval, and capacity-aware registration with waitlists; delivered the project on time
