EMERY RESZKA

EmeryReszka@outlook.com | (317) 864-7197 | Osprey, FL | linkedin.com/in/emery-reszka | github.com/eareszka | eareszka.github.io

EDUCATION

Florida Gulf Coast University — Fort Myers, FL Expected May 2027
B.S. Computer Science

University of Wisconsin–Milwaukee — Milwaukee, WI Sep 2022 – May 2026
CS coursework before transferring: Data Structures & Algorithms (Java), Introduction to Software Engineering

PROJECTS

WingIt! – AI Texting Coach Jun 2026 – Present
React Native (Expo), TypeScript, Python, Claude API, Ollama, PyTorch, Docker, Fly.io wingit-backend.fly.dev

- Built a cross-platform app that reads chat screenshots and drafts replies matched to the other person's texting style, shipping iOS, Android, and web from one Expo codebase; submitted to the App Store
- Engineered a Python backend on Fly.io for Claude vision transcription and reply drafting, with account rate limits and Stripe, Apple, and Google Play billing webhooks
- Added a self-hosted model path (Ollama on a home GPU via Cloudflare Tunnel) and an eval harness that measured 98.8% speaker accuracy vs. 87% for Claude Haiku over 60 screens, at half the latency
- Built a QLoRA fine-tuning pipeline (PyTorch, Unsloth, TRL) on synthetic conversations; wrote 64 unit tests

Pulse – Market Move Alerts Jan 2026 – Present
JavaScript, Node.js (Express), PostgreSQL (Supabase), Web Push, Fly.io, Vercel pulse-sooty-pi.vercel.app

- Built a web app (PWA) that tracks Polymarket, Kalshi, and stock prices and alerts on moves past a user-set threshold
- Integrated 3 data APIs (Polymarket, Kalshi, Alpaca) on a 45-second polling cycle, using concurrency limits and deduplicated fetches to keep cycle time flat as tracked items grow
- Delivered alerts via web push and Firebase Cloud Messaging, with Supabase accounts that sync across devices

Four Castle Chronicles – 2D RPG Apr 2026 – Present
C++17, SDL2, Make, Python (asset tooling) github.com/eareszka/C-game

- Built a solo 2D RPG in about 63k lines of C++ with seeded world generation, dungeons, battles, and crafting
- Cut world generation (9 million tiles) from 24 s to 4 s via compiler optimization, verified by tile hashes on 4 seeds
- Wrote about 20 headless test tools that check spawns, battles, crafting, and story flow without launching the game

Campus Event Management System Nov 2025
Python, Django — team course project github.com/eareszka/campus-event-mgmt

- Designed the Django data model for a team event platform: user roles and capacity-aware registration with waitlists

EXPERIENCE

IMG Academy — Bradenton, FL Jun 2026 – Aug 2026
Aquatics Staff Member

- Supervised swimmers and enforced pool safety rules for student-athletes and summer campers

University of Wisconsin–Milwaukee Athletics — Milwaukee, WI Sep 2022 – May 2026
NCAA Division I Swimmer

- Trained and competed 20–40 hrs/week while carrying a full-time computer science course load
- Volunteered with the team on habitat restoration at Schlitz Audubon Nature Center

UPS — Elm Grove, WI Sep 2023 – May 2025
Preloader

- Loaded packages onto delivery trucks in route order before dispatch, working around classes and Division I training

SKILLS

Languages: Python, TypeScript, JavaScript, Java, C++, SQL, HTML/CSS
Frameworks & Libraries: React Native (Expo), Node.js (Express), Django, SDL2, PyTorch
AI/LLM: Claude API, Ollama, QLoRA fine-tuning
Tools & Platforms: Git, Docker, Fly.io, Vercel, Supabase, Linux
