EDUCATION

Florida Gulf Coast University — Fort Myers, FL

B.S. Computer Science, Expected May 2027

University of Wisconsin–Milwaukee, School of Engineering — Milwaukee, WI

Computer Science coursework, September 2022 – May 2026 (transferred to FGCU)

EXPERIENCE

IMG Academy — Bradenton, FL

Aquatics Staff Member | June 2026 – August 2026

- Maintained a safe aquatics environment by supervising swimmers and monitoring pool areas
- Enforced facility safety rules and remained prepared to respond to water emergencies
- Supported daily aquatics operations for student-athletes and campers at a world-class sports academy

University of Wisconsin–Milwaukee Athletics — Milwaukee, WI

NCAA Division I Student Athlete | September 2022 – May 2026

- Balanced full-time academics with 20–40 hrs/week of training and competition
- Demonstrated discipline, consistency, and strong time management

UPS — Elm Grove, WI

Preloader | 2023 – 2025

- Loaded delivery vehicles in route order before drivers departed, working to daily time and accuracy standards
- Worked the job during the school year alongside full-time coursework and NCAA Division I training

PROJECTS

WingIt! – AI Texting Assistant

- Cross-platform app that analyzes conversation screenshots and drafts replies matched to the other person's tone and style
- Built with React Native (Expo), TypeScript, and a Python backend using the Claude API; deployed via Fly.io to web, iOS, and Android from a single codebase
- Features a built-in AI coach and 'The Read' conversation analysis; privacy-first design discards screenshots after processing

RegionOS – Screen Region Monitor | v0.1.0 released July 2026

- Windows desktop app for drawing 'regions' anywhere on screen and live-previewing each one independently — even when source windows are covered or minimized
- Runs fully offline using deterministic computer vision; shipped installer and portable builds (Python, PyInstaller) with drag-and-drop window tracking and fullscreen grid view
- <https://github.com/eareshzka/RegionOS>

Pulse – Feel Ahead | Jan 2026 – Present

- Real-time dashboard detecting anomalies across markets (stocks, predictions, sports betting)
- Aggregates multi-source data to identify trends early
- <https://pulse-sooty-pi.vercel.app/>

Campus Event Management System (Django)

- Full-stack app with authentication and role-based access
- Worked in sprint-based Agile development cycle across frontend and backend teams
- Implemented registration, waitlists, attendance tracking

ACTIVITIES & INVOLVEMENT

Schlitz Audubon Nature Center — Milwaukee, WI

Volunteer | 2023 – 2025

- Invasive plant species cleanup and environmental restoration
- Volunteered alongside UW-Milwaukee Swim Team supporting conservation efforts

SKILLS

Programming: Python, Java, C, TypeScript, JavaScript, SQL, R, HTML

Frameworks & Tools: Django, React Native (Expo), PyTorch, SDL2, PyInstaller, Git (version control), Linux (WSL), REST APIs, JSON

Concepts: Object-oriented programming, data structures and algorithms, computer vision, LLM / AI API integration, prompt engineering, Agile sprint development, debugging and troubleshooting

Strengths: Problem Solving, Adaptability, Time Management, Communication, Collaboration, Teamwork in Group Settings
